## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1-30 and 32 are allowed.
2. The following is an examiner's statement of reasons for allowance: The prior art of record does not disclose finding the highest priority load among the inactive loads; determining whether the highest priority load is a member of a class; and connecting all members of the class to which the highest priority load is a member to the power supply if connecting the entire class would not bring total system demand above an optimum level, wherein total system demand is the total energy demand for all loads connected to the energy supply. The allowability, at least in part, resides in this fact.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
